

USE

- The AD-200 and AD-1000 kits are specially designed for the UREA supply to the vehicles from a barrel of 200 litres or a tank of 1000 litres.
- Because of its base, the kit is easy to use and place; it can be placed in any type of tank or hang in the wall.
- The UREA supply kits are manufactured with materials compatible with this type of fluid to avoid damages both in the liquid and its parts that are in touch with it.

SAD-1000M KIT

COMPOSED OF

- Centrifugal self-priming pump - JET type
 - Flow: 40l/min
 - Consumption: 2,1A
 - Motor: 0,37kW 230VAC, 50Hz, single-phase, self-ventilated
 - R.P.M.: 2800rpm
 - S1 continuous duty
 - Protection: IP-44
 - ON/OFF switch
 - 2m electric cable with approved plug
 - Inlet/outlet: 1" GAS (BSP)
 - Maximum liquid temperature: 60°C
 - Maximum pressure: 3,2bar
 - Maximum suction length: 8m
 - LeqA(dB):72
- Metallic support with nozzle hanger
- 1,5m transparent suction hose with brackets special for UREA
- 4m delivery hose Ø3/4" special for UREA
- Universal zinc-plated hook set (adaptable to all type of tanks)
- Minimum kit operation temperature: - 10°C

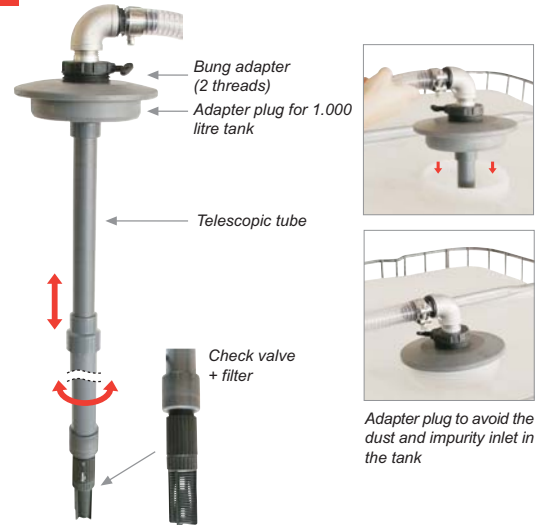

OPTIONAL ACCESSORIES:

- **MG-80 volumetric mechanical meter** special for UREA · Accuracy: +/-1%
- **PT-60 manual supply nozzle** special for UREA
- **PA-60U automatic supply nozzle** special for UREA
- **Suction kit** for tanks of 200 and 1000 litres (See Kit 1, 2 and 3)

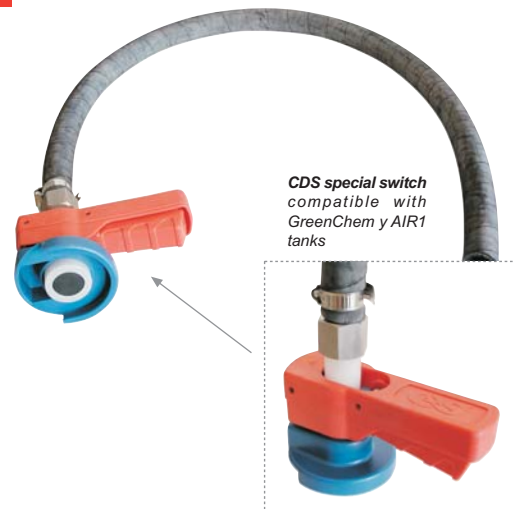

1 SUCTION KIT FOR 200 LITRES BARREL

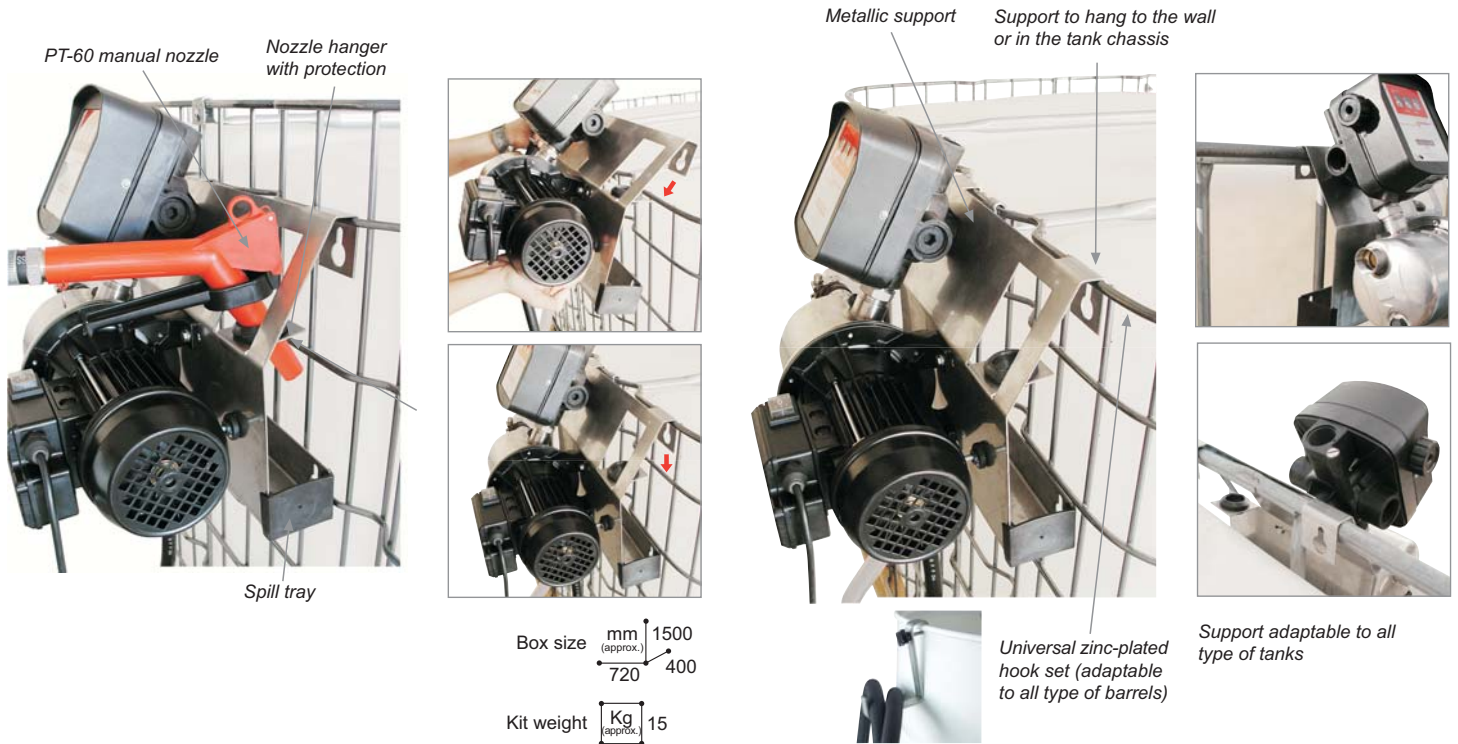

2 SUCTION KIT FOR 1000 LITRES TANKS

3 SUCTION KIT FOR 1000 LITRES TANKS (CDS)
